

Aliens Across America

Where are they from? What do they look like? What do they want from us? These are common questions people ask when dealing with the possibilities of alien existence. Weve all been curious at one point or another about what exists beyond planet Earth. This book contains remarkable unexplained events that have taken place all over the United States of America. This collection holds fifty stories, one from each individual state. Each tale vastly different and unique from anything youve read before. This is no ordinary book about extra terrestrials... You will unravel stories that expand your mind even further beyond the idea of abductions, mutilations, and crop circles. Inside there are a couple of stories of missing people never found who loved ones believe have been abducted and taken to different planets. In another blurb, read about a woman who is certain her child is half human/half alien. A story impossible to forget is the fable of a man and his wife who raised an alien child for 6 years. Explore in detail about a young woman who swears she had a strange sexual encounter with the fourth kind. You will even read a love story that is (literally) out of this world, and many, many more interesting stories. Whether you are an abductee, skeptic, researcher, or just want an interesting story to tell around the camp fire; this book is for you. Dont miss this opportunity to read about peoples beliefs, theories, and encounters that opened up their minds and forever changed their lives.
