

The Religious Aspect of Philosophy, a Critique of the Bases of Conduct, and of Faith (Classic Reprint)

The form and order of the treatment depend on the nature of these latter problems themselves, and are not such as a system of philosophy, expounded solely for its own sake, would be free to take. The religious problems have been chosen for the present study because they first drove the author to philosophy, and because they, of all human interests, deserve our best efforts and our utmost loyalty. A large portion of this discussion seeks to appeal both to the special student of philosophy and to the general reader. A considerable part, again, can with the very best of fortune hope to interest the special student of philosophy, but cannot hope for more. The Preface must therefore tell what sort of appeal is made to each of the two classes of readers. (Typographical errors above are due to OCR software and do not occur in the book.)
