

Every one of us, at sometime or other, has witnessed unexplainable occurrences with children. Whether its a baby laughing and smiling at the ceiling, or children waking at night and refusing to go back to bed because of a monster or person being there. We have witnessed these things and probably tried to explain them away logically, or just pushed them aside as nonsense. This book attempts to explain these occurrences using very tangible realistic examples and explanations we can all relate to. It also looks at childrens precognitive abilities and examines how they can predict things from thunderstorms to miscarriages. **Psychic Kids** covers some childrens uncanny ability to convey messages and facts from dead relatives, people they either did not know or people recently dead that they were close to and talks about the Guardian Angels that appear at crucial times, saving childrens lives. Written in an accessible way, its a thought provoking easy read that introduces the reader to a more interesting angle on things they have experienced in their own lives and providing a starting point for them to delve further into experiences that may have puzzled and intrigued them in the past.
